

The Chi-Namel Ready-to-use Graining System can be successfully applied by any inexperienced person. Saves money for the painter and assists him in producing a perfect grain. It completely hides the color and blemishes in old flooring, and gives a finish which has the color, grain effect and wearing quality of new hard wood.

No old floor so black, so rough that the Chi-Namel Graining System cannot make it suitable to use with rugs. Same effect may also be applied to cement floors. Make the old carpet into rugs, and give your floors the New Chi-Namel finish and be up-to-date. Costs only 2c per square ft.

Directions for Graining

Apply Graining First Coater—Allow it to dry over night, next day apply Graining Compound and immediately draw Self-Grainer through the Compound. Compound will dry in 15 minutes, after

which Natural or any of the colored transparent Chi-Namel Varnishes may be applied.

Chi-Namel Graining Sets

With which any amateur can reproduce the grain of natural wood as shown above.

Set No. 1, (3 inch width).....price with Comb

Set No. 3, (5 inch width).....

Corner and Border Stencil Set No. 1 per set
For producing the inlaid hardwood effect on Chi-Nameled floors.

Crack Filler lb. lb. lb. lb. lb. lb.
For closing cracks between floor boards, knot holes, nail holes, etc., in floors preparatory to Graining with the Chi-Namel Ready-to-Use Graining Materials.

Graining First Coater 1 Gal. ½ Gal. Qt. Pt. ½ Pt. ¼ Pt.
(Lt. or Dk.) For preparing surfaces for graining with Chi-Namel Graining Compound, Opaque and hides all defects.

Graining Compound—Light, Medium or Dark.
To be applied over Graining First Coater. The wood grain is outlined in it with Chi-Namel Self-Grainer while coating is wet. To be followed with Chi-Namel Varnish.

Floor Outfits each
Containing all tools and material to grain, stain and varnish one average size floor.

Directions

For Chi-Namel New Wood

Chi-Namel Penetrating Stain if used, must be applied to the bare wood and allowed 24 hours for drying.

Coarse Grained Wood, such as ash, oak, chestnut, walnut, mahogany, etc. After the Penetrating Stain, apply Chi-Namel Paste Filler, (directions on each package). Allow 24 hours to dry, then finish with Chi-Namel Varnish.

Close Grained Wood, such as pine, whitewood, cypress, fir, maple, etc. After the Penetrating Stain apply Chi-Namel Clear First Coater (except for exterior surfaces). If this is not at hand use Chi-Namel Natural Varnish. Do not use Shellac.

Varnish should be selected with reference to the kind of service required, as follows:

Floors, Chi-Namel Natural Varnish, two coats in addition to Clear First Coater, 24 hours apart for gloss finish.

Upright Surfaces, such as doors, wainscotings, mantels, base boards, etc. Chi-Namel Heavy Interior Varnish in addition to Chi-Namel Clear First Coater, for gloss finish.

Exterior Surfaces, Chi-Namel Exterior Spar Varnish, three coats 48 hours apart.

Egg Shell Gloss, rub final varnish coat with Chi-Namel Shine Easy and Chi-Namel Rub Easy on a soft cloth.

Dead or Dull Finish, rub final varnish coat with water and Chi-Namel Rub Easy on a soft cloth—or coat with Chi-Namel Dull Natural Varnish.

Waxed Finish, apply Chi-Namel Prepared Wax over Chi-Namel Varnish for floors and apply over Wax Like finish for upright work or furniture and rub with dry cloth.

Durable Mission Finish, apply Chi-Namel Wax-Like over Chi-Namel Penetrating Stain.

To Re-Varnish Previously Finished Wood

Clean with washing powder and rinse well; when thoroughly dry apply Chi-Namel Varnish. For best results, remove old finish with Chi-Namel Varnish Remover and finish as directed for new wood.

To Restore the Old Color, use Chi-Namel Colored Varnish. To give new lustre without changing color, use Chi-Namel Natural Varnish.

Chi-Namel

A Finish for Everything about the Home

For Sale by

THE OHIO VARNISH COMPANY
Sole Manufacturers
CLEVELAND, O. U.S.A.

Chi-Namel

Cheapest by the *yard*—because a gallon covers one-third more surface than any other varnish.

Cheapest by the *day*—because it takes a third less time on the part of workmen to brush it upon a given surface.

The reason is, it is made of the best materials that make varnish, hard gum and specially treated oils, so that extreme toughness, elasticity and water resisting qualities result.

Hammer it, scratch it or oil it; it will neither turn white nor lose its gloss. Best for new buildings; best for old ones.

For furniture or any wood or metal surface.

Architectural Varnishes—Clear

	1 Gal.	½ Gal.	Qt.	Pt.	½ Pt.	¼ Pt.
COVERING CAPACITY—2 Coats	sq. ft. 400	sq. ft. 200	sq. ft. 100	sq. ft. 50	sq. ft. 25	sq. ft. 13

Natural Varnish

For new or old floors, furniture, woodwork, linoleum, etc.

Heavy Interior

For upright interior surfaces of new buildings. Same quality as Natural but heavier body. Not to be used on floors.

Dull Natural

Gives a dull effect resembling a rubbed finish when applied over a stained or gloss surface.

Wax-Like

A varnish that gives the effect of a wax finish but contains no wax.

Exterior Spar

For outside doors, boats and other surfaces exposed to weather.

Marine Spar

Made especially for boats and other surfaces that are continuously submerged in water.

Clear First Coater

To be used in place of Shellac, Pigment Surfacer or other first coating preparations, on new woodwork before finishing.

Auto and Carriage Varnishes—Clear

Pale Wearing Body

For finishing coats on bodies of high grade vehicles, such as carriages, automobiles, etc. May be used over light colors.

Heavy Gear

For finishing coat on gears of high grade vehicles.

Pale Carriage Rubbing

For under coats on high grade vehicles.

Clear Carriage

For finishing or refinishing bodies and running parts of all vehicles, except over gray or very light colors.
